

## 2-4-6-8 Favor Box

By Jen Young © Copyright *All Rights Reserved*

### Supplies

- Scor-Pal
- Scissors
- 1/8" Hole Punch
- Scor-Tape™ ( Premium double sided adhesive)
- Paper Cutter
- 8-1/2" x 11" DS Paper (You can create 2 boxes with 1 sheet)
- Ribbon

**Step 1:** Take the 8-1/2" x 11" DS paper, and cut in half at 5-1/2". You will be able to make 2 favor boxes with each 1/2 sheet.

**Step 2:** Align the 8 1/2" to the top fence as illustrated. Score at 2", 4", 6" and 8".

**Step 3:** Turn paper 90 degrees, Align 5-1/2" length to top fence as illustrated. Score at 2".

**Step 4:** Cut the score marks from the edge to the 2" score line. This will become the bottom of your box. You will have four 2" slits after cutting them all. Remove the small rectangle that is formed by the 8" score line on the right hand end.

**Step 5:**  
Fold on all creases.

**Step 6:** With design side up, attach Scor-Tape™ to 3 of the 2" squares, as well as the entire tab at the end on the right (thin tab). Apply double stick tape as close to the crease as possible. This is where the edges will meet up, and you do not want any gaps, or paper to look like it's not sticking.

**Step 7:** Flip your paper over, and adhere Scor-Tape™ to the bottom right 2" square. Apply double stick tape on all 4 edges of this piece.

**Step 8:** Starting with the thin tab, attach the edges together, and create a square tube.

**Step 9:** Fold in each of the squares one on top of each other, with the last one being the one that has all 4 edges taped.

**Step 10:** Fold in both sides, squeeze the tops together like a milk carton.

**Step 11:** Pinch together tightly and punch two 1/8" holes.

Thread ribbon through the 2 holes.... Tie and your favor box is completed!

You can vary the height of these boxes by varying the length of the paper.  
An 8 1/2" x 11" sheet of cardstock gives you a very tall box.
