

Card Box

Tutorial by Maria Bell

© Copyright 2007 All Rights Reserved

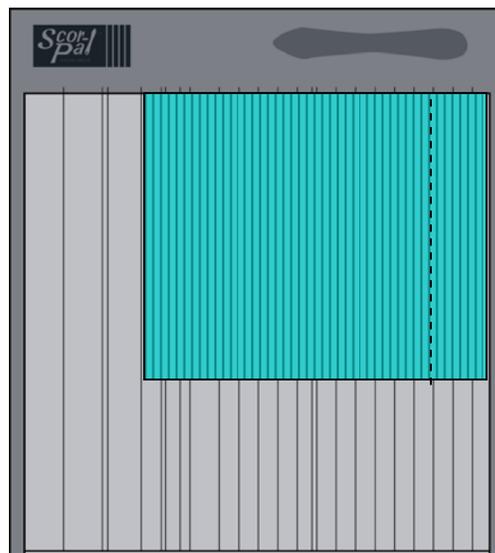

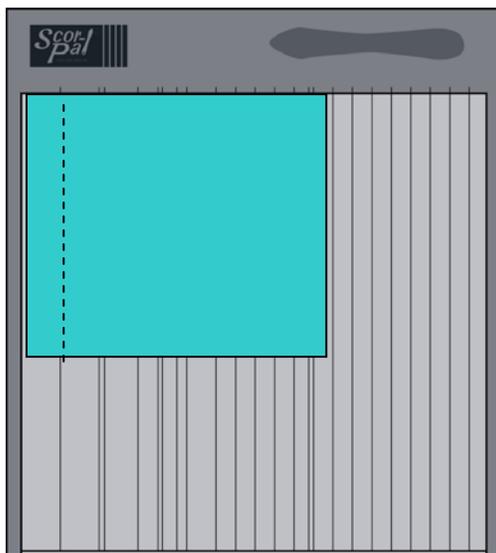

Supplies:

- Cardstock or designer paper (heavy weight)
- 1 piece - 8 3/4 x 7 1/2" (cover of box)
- 1 piece - 7 7/8 x 6 5/8" (bottom of box)

Scor-Pal®

Scor-Tape™ (Double Sided Tape) or glue

Scissors

Paper not to scale

Step 1:

Align the 7 7/8 x 6 5/8" cardstock at the top ruler fence and align the **left** side against the **left** fence. Score at the 1" groove using the Scor-Pal tool.

Repeat the process for all 4 sides of the cardstock.

Step 2:

Score the 8 3/4 x 7 1/2" cardstock at 1 1/2 inch to all four sides of the cardstock (box cover).

Align the 8 3/4 x 7 1/2" cardstock at the top ruler fence and align the **right** side against the **right** fence.

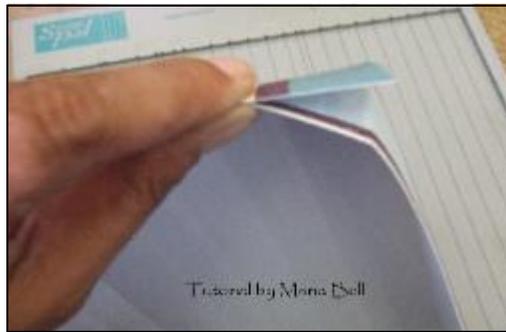

Score at the 10 1/2" groove using the Scor-Pal tool.

Repeat the process for all 4 sides of the cardstock.

Step 3: Fold at the score lines for both pieces (fold inwards with the designer side on the outside, this is the box bottom). Flatten folds with the Scor-Tool as illustrated

Step 4: At the corners use scissors to cut towards the center and end at the score line. Snip off a triangular shape using the score line as your guide. Repeat the steps for all four corners of each piece.

Step 5: Apply Scor-Tape™ or glue to all four triangular flaps of both pieces. Apply the adhesive on the designer side of the box

Step 6: Fold the cardstock and adhere the triangular flap on to the inside of the box to hold the box together.

This is the completed box. It can hold 4 to 5 (A2) handmade cards (4 1/4 x 5 1/2") as well as envelopes. Decorate the box as desired. Create coordinating handmade cards to match the theme of your box design.
