

ORGAMI BATS

By Charlene Driggs © 2008 *All Rights Reserved*

The Scor-Pal makes it super simple to create dozens of these spooky bats in no time at all. Hang from tree branches for a fun and easy Halloween decoration.

Supply List

Scor-Pal

8" x 8" square black vellum or origami paper

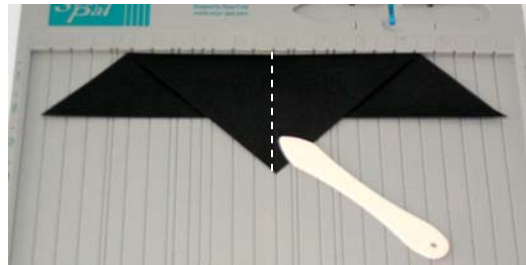

Scissors

Glow in the dark paint

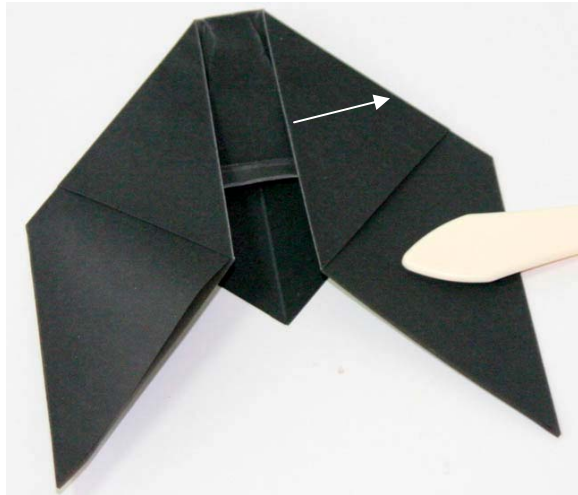

Step 1:

Align opposite points of the paper on the 6" groove. Score, and fold to form a triangle. For this project make sure the valley of the score is on the inside.

Step 2:

Place the flat end of the triangle along the left side of the **Scor-Pal**. Score at the 2" mark. Fold on the score line again using the Scor-Tool, making sure the valley of the score faces the inside.

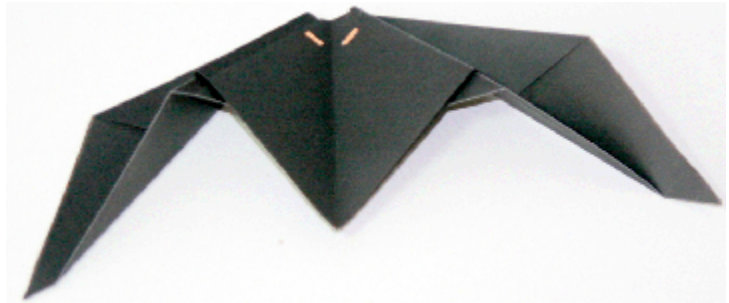

Step 4:

Flip the bat over so that the 2" flap faces up. Fold each end in about 3/8" from the center score. Fold using the Scor-Tool, pressing firmly. You have now formed the wings.

Step 5:

Fold each "wing" back onto itself to the fold line.

Step 6:

Flip the paper over so that the wings are to the back and the flat side of the vellum faces you. Use your scissors to cut ears on the flat edge. Flip the bat again. Use glow in the dark paint to make eyes.

Hang using dental floss, fishing line or use glue dots to tape to branches.

Optional: Smaller bats may be made using 6" x 6" squares of vellum or origami paper and following the same instructions.
