

Triangular Tri-fold

Designer Beate Johns Copyright © 2007

Supplies needed:

Scor-Pal®

One piece of cardstock 3 1/2" x 10 1/2"

One 3 1/4" square of patterned paper cut in half diagonally

Image that will fit on a 3 1/2" card front

Ribbon

Adhesive

Step one: Line your cardstock up with left and top fence of your Scor-Pal and score at 3 1/2" and 7".

Step two: Align one corner of your cardstock with the 7.333" groove, this is the one marked with the inverted triangle and the opposite corner on the same groove. See picture. Score the top square diagonally.

Step three: Turn cardstock around and repeat step two on the other corner square to add a diagonal score through that square. Make sure both diagonals go in the same direction

Step four: Fold your left square into the middle and then fold the lower triangle up.
Fold your right square into the middle and then fold the upper triangle down

Step five: Tape your patterned paper triangles on the top facing triangles of your card.

Step six: Wrap ribbon around the card and tie into a bow. Don't tape it down.

Step seven: Add adhesive to only one side of your main image. Tape it over the ribbon to hold it down.

Make sure you only have the image taped on one half of your triangle trifold. Otherwise you won't be able to open the card.
